

**IN THE SPECIFICATION:**

Please amend the Specification as follows.

**Please amend the second full paragraph on Page 22, beginning on line 8 to read as follows:**

Although the foregoing explanation is ~~relates~~related to a single-spool gas turbine engine, the invention can also be applied to a multi-spool gas turbine engine having two or more axes.

**Please amend the first full paragraph on Page 25, beginning on line 8 to read as follows:**

In the system, the housing 12 is formed with grooves (insertion grooves) 54 at its bottom ~~face~~face that receive forks or blades of a forklift. Thus, a bottom face of the housing is formed in different directions with multiple insertion grooves for receiving the forks or blades of a forklift so that the system can be lifted by a forklift from any desired one of the different directions. Therefore, in addition to the effects explained regarding the first aspect, the system can be easily moved irrespective of the shape of the installation site and a further improvement in maintenance ease can be realized.
